Macos Optimizer: how it is put together

Modified to remove this line: sudo spctl --master-disable

sketched from the file

Macos Optimizer: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what Macos Optimizer is for

WHAT IT IS

Modified to remove this line: Sudo spctl --master-disable

WHAT GOES IN

The files at the top of the tree: script.sh, README.md, LICENSE.

WHAT COMES OUT

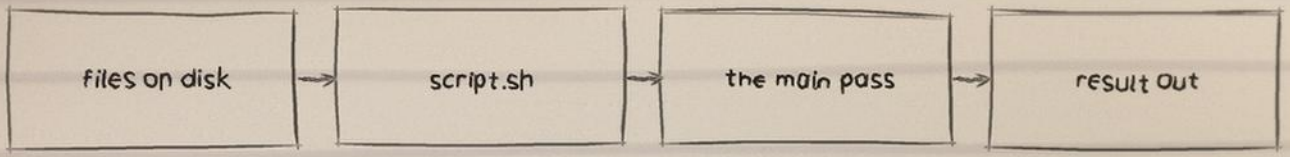

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, GK

Macos Optimizer: data flow, in one direction

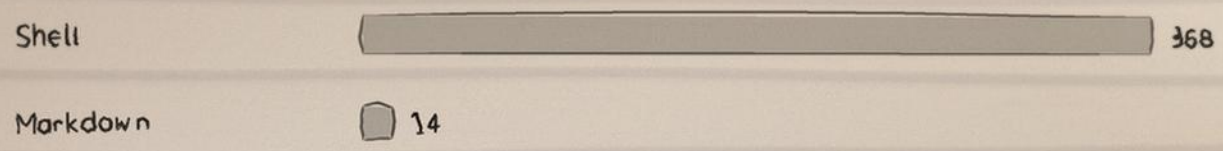

One direction. Anything the code does not do is not drawn.

second sheet, GK

Macos Optimizer in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

3 files in the tree.
7 commits, first 2024-12-08, last 2024-12-08, from the local git log.
No test files by name in this snapshot.

counted and drawn, BK

macos optimizer: schematic of the apparatus

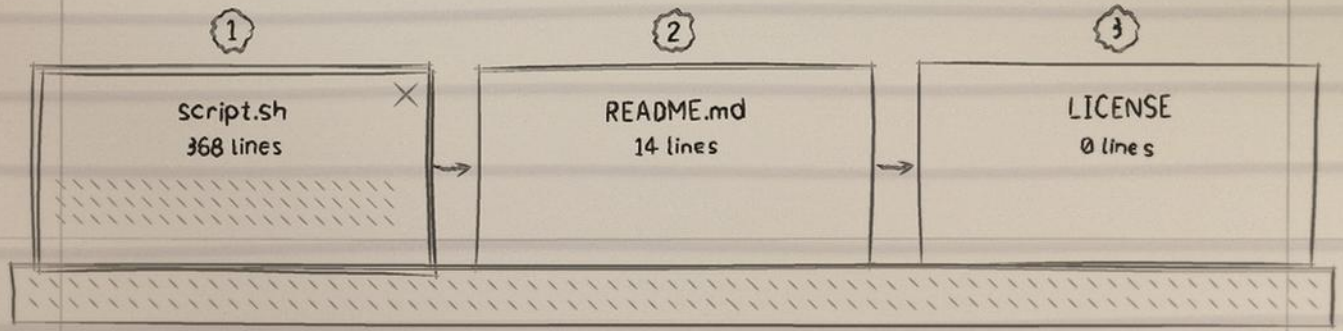

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. script.sh
2. README.md
3. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 3 files, 382 lines counted

turns of the crank so far: 7 commits, 2024-12-08 to 2024-12-08

measured and sketched, GK
